## To reduce pollution, people have to recycle !!!

BY LUHEMBUE LUCIE AND BELVAL NOEMIE

## How to reduce the pollution ?

*The pollution is an environmental issue.  
Many solutions are possible to fight  
against this important issue.  
We have to stop it !*

In my opinion,  
people have to recycle, sort the waste, use  
electric cars, we should use public  
transportations. For short distance we can use  
bikes, we have to favor carpooling, decrease  
the greenhouse effect, make compost and we  
have to throw the papers in the trash not in  
the sea or on the ground....

## How to recycle ?

According to me,  
to be eco friendly citizens, the people could  
compost all vegetable peels and fruit skins in  
their garden, we should make compost in our  
own garden, or we could all separate the  
different kinds of wastes. We can go to the  
recycling centre, sort batteries or recycle  
plastics and old clothes...

*In my opinion, people don't  
recycle enough.*

*The  
greenhouse  
effects pollute  
the  
environment,  
we have to  
stop them !!!*
